TREE PLANTING AND INSTALLATION

Planting or Tree Installation is a service where by we install the tree in your yard. We like to do the following under our service: Bring the Tree(s), prep the planting area, to minimize mess by laying down tarps, digging the hole, amending the soil with compost, backfilling, watering the tree in, stake the tree (if needed), fertilizing the tree and cleaning up our mess, so all you have is a new tree to look at! We also guarantee our plantings for the first year.

Contractor's License: JOBSN**070PD for WA State.

Planting is 80% of the cost of the tree(s), with a cumulative total over \$100.00. For tree(s) with a total value under a \$100.00 it is double the cost of the tree(s).

For us to plant or install your trees, we require information about location of your yard or planting site, soil type, yard topography, access to the planting site, known obstacles, utilities, when is it best for you and other useful information we have a Planting/Tree Installation Questionnaire for you to fill out at time of invoice or if you can print it from our website (jobsnursery.com/services_offered.htm) to have it ready ahead of time.

Prepare for planting: Decide where you want the plants. 2 to 3 days prior to planting we would like you to water the area for the new plants so soil is moist 18 to 24 inches deep (spring, summer and fall). Don't water the lawn for 24 hours before the scheduled planting. This helps give your new plants a great start and minimizes our impact on the lawn or planting area.

Had a tree removed, the stump recently ground out, and want it in the same place? First have the stump ground to 24 inches deep. Then let us know so we can bring extra dirt (\$30 per tree) so we can remove the chips and replace that with good dirt.

Remember you are responsible for clearing cars, projects, garden structures, fences, dog poop, debris and other portable obstacles before we come so we can install the tree without delay.

Any time a purchase for plants and planting is over \$1,000 we will survey the location before committing to the planting job. We will call you to set up an appointment for surveying. We will not work under unsafe conditions. If our crew decides working conditions are unsafe to get a plant to a location for planting they will not take it there. We generally are concerned about moving large plants on steep grades, on hills or slopes, but we are sure we could encounter many other unsafe conditions and our crew will refuse to endanger themselves at any time.

To answer question of hauling, accessibility, tractor issues and other commonly asked question ask our FAQ sheet on delivery and planting or download it at www.jobsnursery.com/services_offered.htm
