**Photographing your site**

-Take several photos from various angles close-up, and from a distance to help orient us with your yard.

-Take photos of views you'll see most, from inside and outside the house.

-Photograph plants you would like identified or would like to keep.

**Measuring Your Site**

-With a tape measure, locate the boundaries of your site and sketch them on graph paper. Indicate which way is north on your paper.

-Give us a sketch of the planting area from a bird's eye view, indicate north and the measurements

-Note if there are slopes, walls, hills or other terrain details

-Measure structures and plants you wish to keep, utility boxes, hose spigots, and windows, noting their width and sill height from the ground.

-Mark areas that are particularly soggy, dry, sunny, windy, shady, or have poor soil conditions.

-Indicate views to keep and those to block.

**For staff use only**
